ELECTRONIC INFORMATION HANDLING CONFERENCE II

Testing and Evaluation

Co-Sponsored by:

University of Pittsburgh, Western Michigan University,
Goodyear Aerospace Corporation, and the Office of Naval Research

Flying Carpet Motel, Pittsburgh, Pennsylvania

The second conference on electronic information handling will be held on Wednesday, Thursday, and Friday, **12, 13 and 14 April 1967**. These dates were selected in an attempt to avoid overlap with other symposia of related interest.

The objective of this conference is to promote information exchange and to stimulate interest in testing and evaluation of information handling systems. The program will treat such topics as design vs. evaluation of information systems, review of the status of testing and evaluation, current research on efficiency and effectiveness in document handling, time-shared computer systems, intelligence systems, command and control systems, and the needs and directions for further research in testing and evaluation. The interest in and research conducted by a variety of organizations supports the fact that testing and evaluation is a difficult problem in the forefront of information handling technology. It is, therefore, appropriate that the conference should be sponsored by university, government and industrial interests.

Attendance at this unclassified symposium is open to all interested individuals. Further information and a preliminary program, when available, may be obtained by contacting:

Allen Kent or Orrin E. Taulbee, Co-Chairmen
